TOTALXen

WHOLE-BODY REJUVENATION

The TOTALXen rejuvenation booth utilises Red and Near Infra Red (NIR) Light Emitting Diodes (LED's) to deliver a whole-body photobiomodulation experience within a fast 8 to 15-minute session. The Red and NIR LED's used, are within the optical window in biological tissue, selectively allowing them to pass deeply into the skin stimulating the naturally occurring regeneration and repair processes.

Not only do you feel soothed and restored, but you also have less soreness, and faster recovery after exercise and your skin has a fresher, more youthful appearance. Anecdotal reports also include better sleep, reduced stress and depression.

The TOTALXen optimised footprint not only minimises the space needed within your clinic but also allows for easy access for your clients without the need to continually disinfect and degrade the booth optical surfaces.

BENEFITS

- Full Body Booth
- Tri-Coloured Output
- Easy Access
- Easy Cleaning
- Fast Treatment Times
- Amazing Results

SPECIFICATIONS

Light Source	Tri-Coloured SMD LED Array
Wavelength	Red 630 +/- 5nm & 660 +/- 5nm NIR 850 +/- 5nm
Irradiance	24.5 mW/cm ² (average density for the entire surface area)
Class	1/B Type
Dimensions	Body (mm): 1125(800 on the top) (L) x 1035 (W) x 1903 (H) Light Source (mm): 1754x837 Per Side
Weight	280Kg
Power Requirement	240V 50Hz 15A
Power Consumption	3.3KVA
